- Implemented a high perfermence and morden blockchain-based Dapp/Dex/Defi for Yeld faming, Staking, Swap, and NFT marketplace.
- Developing and maintaining applications using Java frameworks such as Spring, Android and Hibernate, as well as implementing RESTful web services using Jersey and JAX-RS.

Seeking to leverage my expertise and skills to effectively contribute to your team, with a passion for innovation and problem-solving.

Skills

React.js, Next.js, Web3.js, Node.js, Redux, EVM, Solidity, MongoDB, MySQL, PostgreSQL, GraphQL, TypeScript, JavaScript, RESTful APIs, NFT, Python, Laravel, Vue, Tailwind CSS, Chakra UI, HTML5, TypeScript, JavaScript, Java

Education

IT technology

University of Caloocan City   03/2016
Received the Bachelor of Degree in IT technology in 2015

Experience

Sr. Full Stack Engineer

Weave Finance • London, England   11/2021 - 02/2023
- Integrated a lot of the features of the DEFI platform using the Web3.js and Next.js(TypeScript)
- Built staking and liquidity pools and maintain optimal workflow.
- Successfully identified and refactored issues within an existing dapp, resulting in a significant improvement in performance, culminating in an impressive 80% increase at later stages of development.

Sr. Full Stack Developer

Aperture Code Inc • CA   04/2021 - 01/2022
- Collaborated with CTO to successfully manage and deliver Vue.js, Laravel, and Postgresql-based CRM projects for corporate clients.
- Carry out quality assurance tests to discover errors and optimize usability.
- Produced high-impact, user-friendly websites that accomplished all business goals.

Blockchain Developer

Mandox LLC • FL   05/2020 - 05/2021

- Implemented clean interfaces and simple, intuitive interactions for NFT Marketplace using React TypeScript and Web3.js.
- Minting, deploy and sale 100000 NFTs and created smart contract.

Java Developer

National Railroad Passenger Corporation • US   02/2019 - 01/2020

- In my previous role as a Java Developer at National Railroad Passenger Corporation, I played a key role in developing an ticket management and e-commerce platform that increased online sales by 30% within the first year of its launch.
- This project required extensive knowledge of Java enterprise technologies like EJBs and JMS, which I was able to implement successfully.

Full Stack Developer

Vcomp Inc • Toronto, ON   04/2018 - 03/2019

- Responsible for full stack web development for all client projects.
- Increased customer satisfaction by 35% and customer retention by 40%.

Laravel Developer

QuizGriz • CA   05/2016 - 03/2018

- Built efficient, testable, and reusable Laravel modules.
- Solved complex performance problems and architectural challenges.
- Integration of REST API, implemented SPA frontend using Vue.js
- Defined and developed MVC, REST, Hybrid (MVC+REST combined) applications.
- Operated in team-based, Scrum environment to accomplish objectives quickly and efficiently.
- Analyzed code and debugged errors to improve system performance.

Objective

To secure a Full Stack developer role where I can utilize my skills in TypeScript, React.js, Next.js, Web3.js, and Node.js to design and develop innovative software applications.

Service

Fully Responsible | Idea Contributor | Complex problem solver | Clean Code | Creative design | Innovative | Service focused | Well-Organized | Critical Thinking | Problem-Solving | Detail-oriented | Multi-tasking | Teamwork
